

Motocross dreams come true!

With constant innovation and improvement, Yamaha has continuously refined its Off Road Competition range, and built strong and durable dirt bikes for everyone, from future champions to seasoned pros. The YZ65 is no exception – its winning performance and proven Yamaha durability take young riders to the victorYZone!

Race-bred specification inspired by the flagship YZ450F makes the YZ65 the perfect youth motocross bike for every budding racer. With a smooth running 2-stroke engine, slick-shifting 6-speed gearbox and a compact, easy handling ergonomic chassis, this high-tech youth race bike is the ideal introduction to the world of motocross.

To complete the race-ready package, the adjustable front suspension makes it easy to set the bike up to suit every rider, and its dynamic YZ-family styling, Icon Blue bodywork and blue rims shows that this little bike has the winning DNA that comes with every Yamaha.

- Smooth and easy to use power
- Light and stable handling
- Effortless 6-speed transmission
- Confident cornering
- Smooth and stable riding
- Adjust your YZ65 as you grow
- Total control in your hands
- Pure YZ race-bred DNA
- Easy maintenance and reliability

Enter the victorYZone!

If you have the desire and determination to win, the YZ65 brings the speed, handling and durability you need to make it in one of the world's toughest sports. It's a serious youth motocross race bike for those destined to success.

The YZ65 is small but mighty. Its potent 65cc liquid-cooled 6-speed engine features Yamaha's race developed YPVS for race-winning power – and the light chassis provides stable handling and high agility. For 2027 it also benefits from new handlebar pad, front wheel bearings and seat skin.

Adjustable 36mm upside down front forks and link-less Monocross rear suspension give stable handling over rough terrain, and the adjustable handlebar position enables the YZ65 to grow with you. Equipped with wave discs for powerful braking, a long padded seat with a new skin and high-grip footrests for comfy riding, as well as updated YZ-family graphics and Icon Blue bodywork, the YZ65 is ready to take you to the victorYZone!

Smooth and easy to use power

One of the most advanced in its class, the punchy 65cc liquid cooled engine features race-developed technology such as the crankcase reed valve induction system for instant throttle response and the YPVS (Yamaha Power Valve System) for smooth torque and power characteristics, making the YZ65 an ideal bike for young racers.

Light and stable handling

The YZ65 is equipped with a semi-double cradle steel frame that features an aluminium subframe, giving light and stable handling and easy agility. Together with the 36mm KYB upside down front forks, an aluminium swing arm and link-less Monocross rear suspension, the chassis provides outstanding stability and consistent lap times.

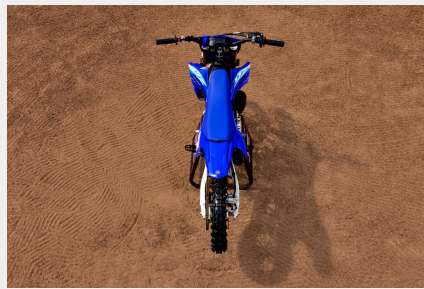

Effortless 6-speed transmission

Carefully chosen gear ratios for the 6-speed transmission have been specially developed to enable the rider to achieve lower lap times by fully utilizing the performance of the 65cc engine. Yamaha engineers have also designed the clutch plates and springs to give a light and easy clutch lever character.

Confident cornering

The 36mm KYB upside down front forks underline the fact that the YZ65 shares the same pure racing DNA that goes into our other YZ models. With their excellent rigidity, they give a planted front-end feel for confident cornering – and their long-travel tubes are built to soak up the bumpiest surfaces.

Smooth and stable riding

The Monocross rear suspension is designed to deliver a smooth and stable ride, and not to bottom out even on the harshest circuits. The lightweight aluminium swingarm enhances the suspension's character and gives extra comfort and features a link-less design that reduces routine maintenance requirements.

Adjust your YZ65 as you grow

Young riders grow quickly, and therefore the YZ65 has been equipped with an aluminium crown featuring four different handlebar positions, giving a total of 27mm forward/backward options to suit your size and riding style. Like our bigger YZ models, tapered handlebars come as standard, and give an ideal balance of shock-absorbing flex and immense strength.

Agregat

Tip agregata	Hlađenje tekućinom; Jednociлиндриčan; Membranski ventil s YPVS; 2-takta
Zapremina	65 ccm
Provrt x hod	43,5 × 43,6 mm
Omjer kompresije	8,1-9,6 : 1
Sustav podmazivanja	Prethodno miješanje
Tip kvačila	Mokro; Višestruki diskovi
Sustav paljenja	CDI
Sustav pokretanja	Nožno
Sustav prijenosa	Stalan otvor; 6-brzinski
Završni prijenos	Lanac
Rasplinjač	Keihin PWK28/1

Šasija

Okvir	Dvostruke grede
Sustav ovjesa sprijeda	Teleskopska vilica
Hod ovjesa sprijeda	215 mm
Sustav ovjesa straga	Njihajuća ruka
Hod ovjesa straga	270 mm
Prednja kočnica	Hidraulični jednostruki disk, Ø 198 mm
Stražnja kočnica	Hidraulični jednostruki disk, Ø 190 mm
Prednja guma	Gume 60/100-14 30M
Stražnja guma	Gume 80/100-12 41M
Kut prednje vilice	26° 25
Predtrag	64 mm

Dimenzije

Ukupna dužina	1.615 mm
Ukupna širina	760 mm
Ukupna visina	1.000 mm
Visina sjedala	755 mm
Međuosovinski razmak	1.140 mm
Minimalna udaljenost od tla	265 mm
Težina (s punim spremnikom ulja i goriva)	61 kg
Kapacitet spremnika goriva	3,5 l
Kapacitet spremnika za ulje	0,5 l
